

AroviaHealth

Clinical Monograph: The Framework for Global Clinical Continuity

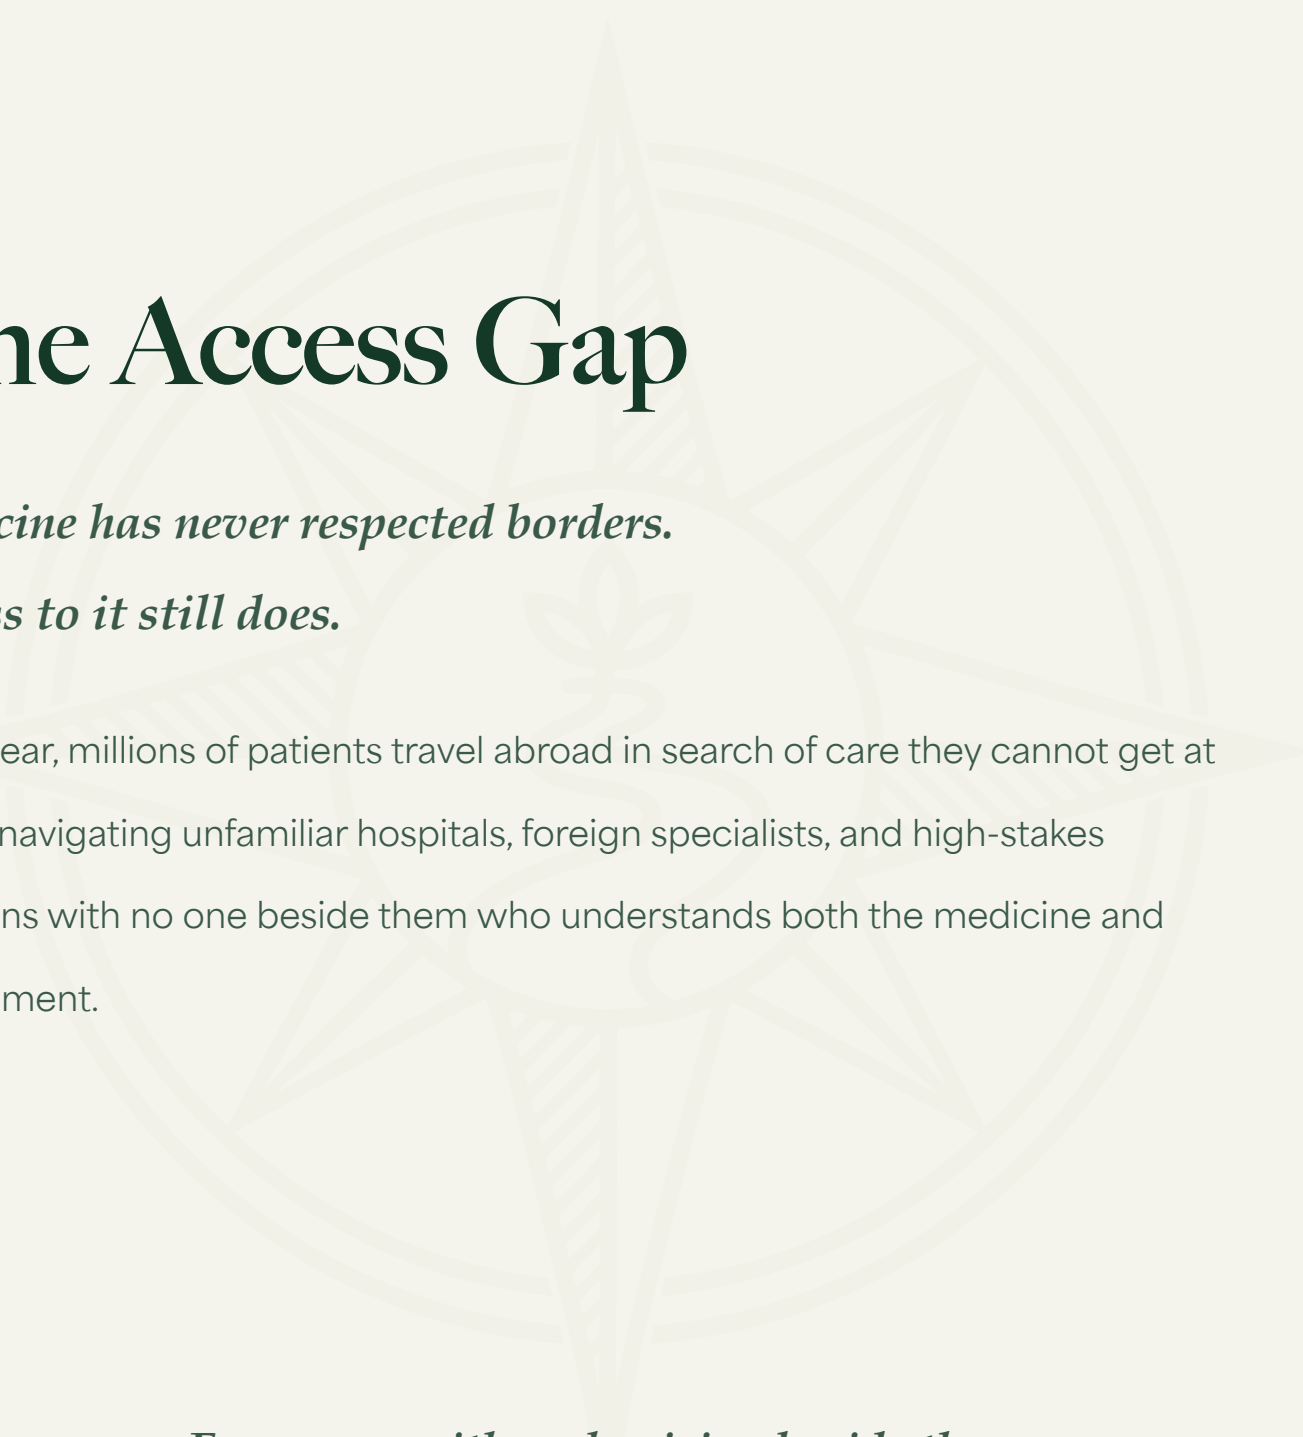

Clinical Governance

Physician-led oversight,
before a patient ever crosses
a border.

Unbroken Continuity

Physician-led oversight,
before a patient ever crosses
a border.

The Access Gap

Medicine has never respected borders.

Access to it still does.

Every year, millions of patients travel abroad in search of care they cannot get at home navigating unfamiliar hospitals, foreign specialists, and high-stakes decisions with no one beside them who understands both the medicine and the moment.

Few cross with a physician beside them.

*AroviaHealth was built to close
that gap.*

Founder's Note

Redefining International Healthcare

Seeking medical care across borders is an act of profound trust. Yet, the current global ecosystem often leaves patients navigating fragmented pathways, resulting in diagnostic ambiguity and disjointed care.

"We are not coordinating logistics; we are establishing the definitive global standard for clinical safety."

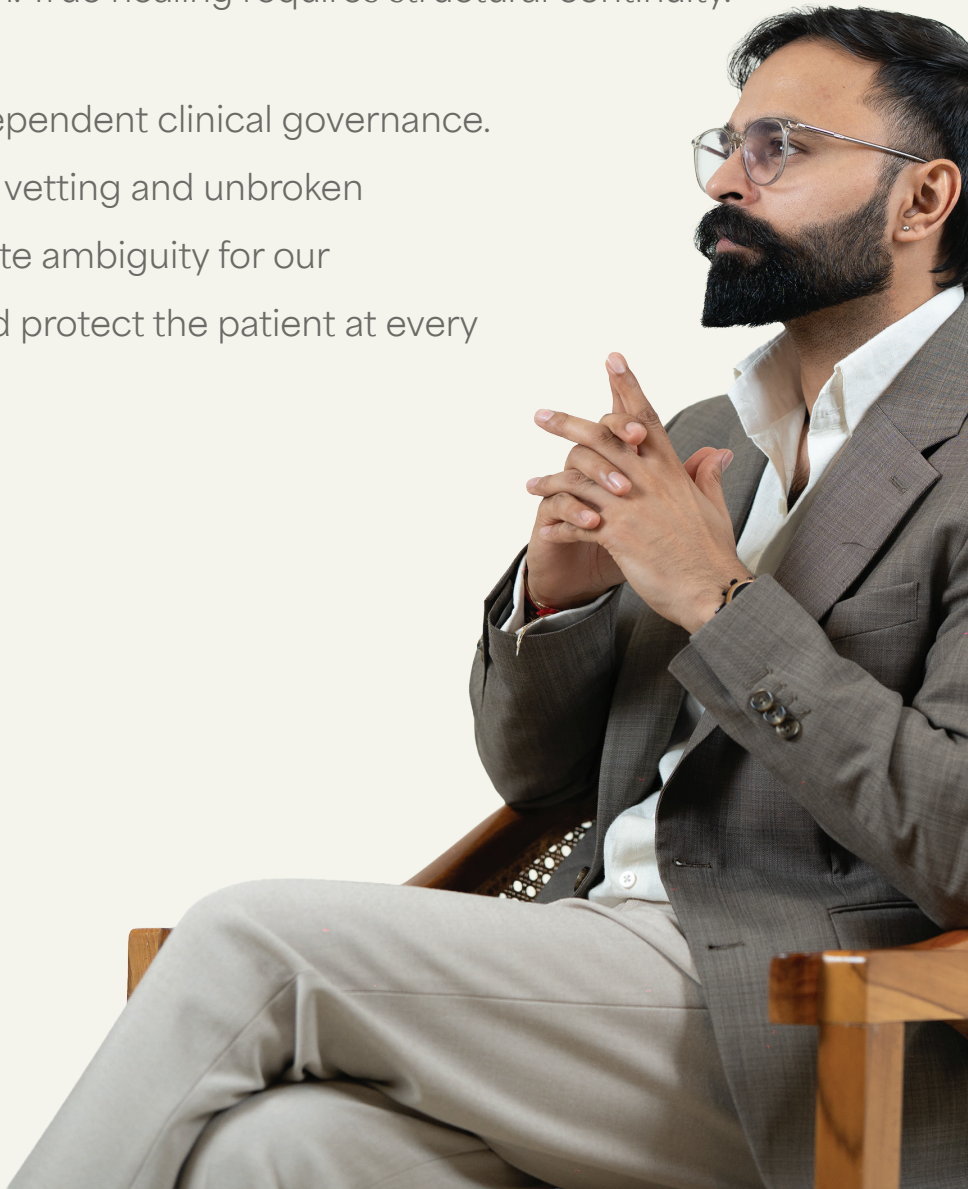

At AroviaHealth, we believe an intervention is merely a single moment in a much larger continuum of health. True healing requires structural continuity.

We bridge this gap through independent clinical governance. By executing rigorous pre-travel vetting and unbroken physician handovers, we eliminate ambiguity for our destination hospital partners and protect the patient at every step.

Dr. Shubham Chhokar

Founder & Clinical Director

Executive Summary: The Clinical Mandate

Arovia Health is an elite, physician-founded healthcare navigation company headquartered in India. We exist to fix the structural fragmentation of international medical travel by putting clinical continuity and true patient advocacy at the center of the journey.

We build structured, high-trust healthcare pathways connecting patients from across the globe—including the Middle East, Africa, Europe, and the West—to world-class medical institutions in India. By combining rigorous institutional partnerships with our unique model of on-ground, doctor-led accompaniment, we are setting the definitive global standard for cross-border care.

What are we Building

Coordinating the global ecosystem of care.

International Patient Navigation

Guiding patients and families through complex medical decisions, ensuring they access the right clinical expertise, anywhere in the world.

Physician & Specialist Networks

Connecting international treating hospitals directly with your home physicians to establish an unbroken line of clinical communication.

Healthcare Institution Partnerships

Forging rigorous partnerships between world-class medical facilities globally and India's premier centers of clinical excellence.

Government & Institutional Cooperation

Collaborating with international health ministries and institutions to elevate the safety and standard of cross-border medical travel.

Insurance & Financial Pathways

Aligning with global insurers and payers to create transparent, predictable, and seamless financial pathways for high-complexity care.

Recovery & Clinical Continuity

Ensuring your journey concludes with a formal clinical handover, empowering your local doctors to manage your long-term recovery safely.

The Global Triage Protocol

Eliminating diagnostic ambiguity before cross-border travel.

Initial Inquiry

Secure multi-stakeholder connection with our internal medical team to initiate structured evaluation.

Clinical Vetting & Preparation

Rigorous review of historical medical records and peer-to-peer case alignment prior to travel.

Curated Treatment Pathways

Selection of vetted, JCI-accredited global centers tailored to precise institutional and clinical requirements.

The Care Continuum

Unbroken clinical advocacy from admission to formal discharge.

Clinical Alignment

Direct peer-to-peer case coordination with destination specialists to ensure absolute alignment before arrival.

Seamless Logistics

Comprehensive management of medical visas, transit, and secure clinical accommodations.

Doctor-Led Clinical Governance

Dedicated physician accompaniment during all consultations to eliminate ambiguity and protect decisions.

Unbroken Clinical Handover

Formal, doctor-to-doctor discharge summaries ensuring zero loss of medical context back home.

The Operational Standard: Independent Governance

A Purely Doctor-Led Standard

Healing is a continuous journey, not just a single procedure. At Arovia Health, we believe that crossing borders for healthcare requires unwavering clinical continuity, ensuring that you are medically supported at every step.

Founded and operated by physicians, we do not replace your treating hospital—we act as your dedicated clinical advocate. From comprehensively vetting your case before you travel, to having our doctors sit beside you in every consultation to translate complex medical decisions, to executing a formal clinical handover to your home physician upon your return.

We ensure that no matter where you are in the world, your medical care remains seamless, safe, and unbroken.

What We Require From a Destination Hospital

Unbroken clinical advocacy from admission to formal discharge.

- **International patient pathways**

A highly structured, clinically vetted route for patients and their families worldwide seeking safe access to India's most advanced medical treatments.

- **Physician-to-Physician Handover**

A formal, documented clinical handover between treating specialist and the patient's home physician at both admission and discharge – no handover through non-clinical staff.

- **A Defined Response Window**

Every partner institution commits to a clear, agreed timeline for case review – whether same-day or several days – so patients and referring physicians always know what to expect. Depth of clinical review always takes priority over speed.

- **Case Transparency**

Full access for our on-ground physician to consultations, records, and treatment planning throughout the patient's stay – no black-box periods.

- **Pricing Integrity**

Transparent, pre-agreed cost structures with no post-treatment billing surprises for the patient or the referring partner.

Establishing Global Clinical Corridors

Patients across the Middle East, Africa, Europe, and the West increasingly seek out India's premier medical institutions for high-complexity, life-saving care. However, accessing this tertiary care across borders has historically brought logistical fragmentation and clinical uncertainty.

Arovia Health bridges this gap by building secure, doctor-led clinical corridors worldwide. By rigorously vetting and partnering with only the highest-tier, JCI-accredited hospitals in India, we ensure that international patients receive elite, uninterrupted medical advocacy—from their home country, through their treatment, and safely back again.

On-Ground Clinical Governance

Unwavering Clinical Advocacy

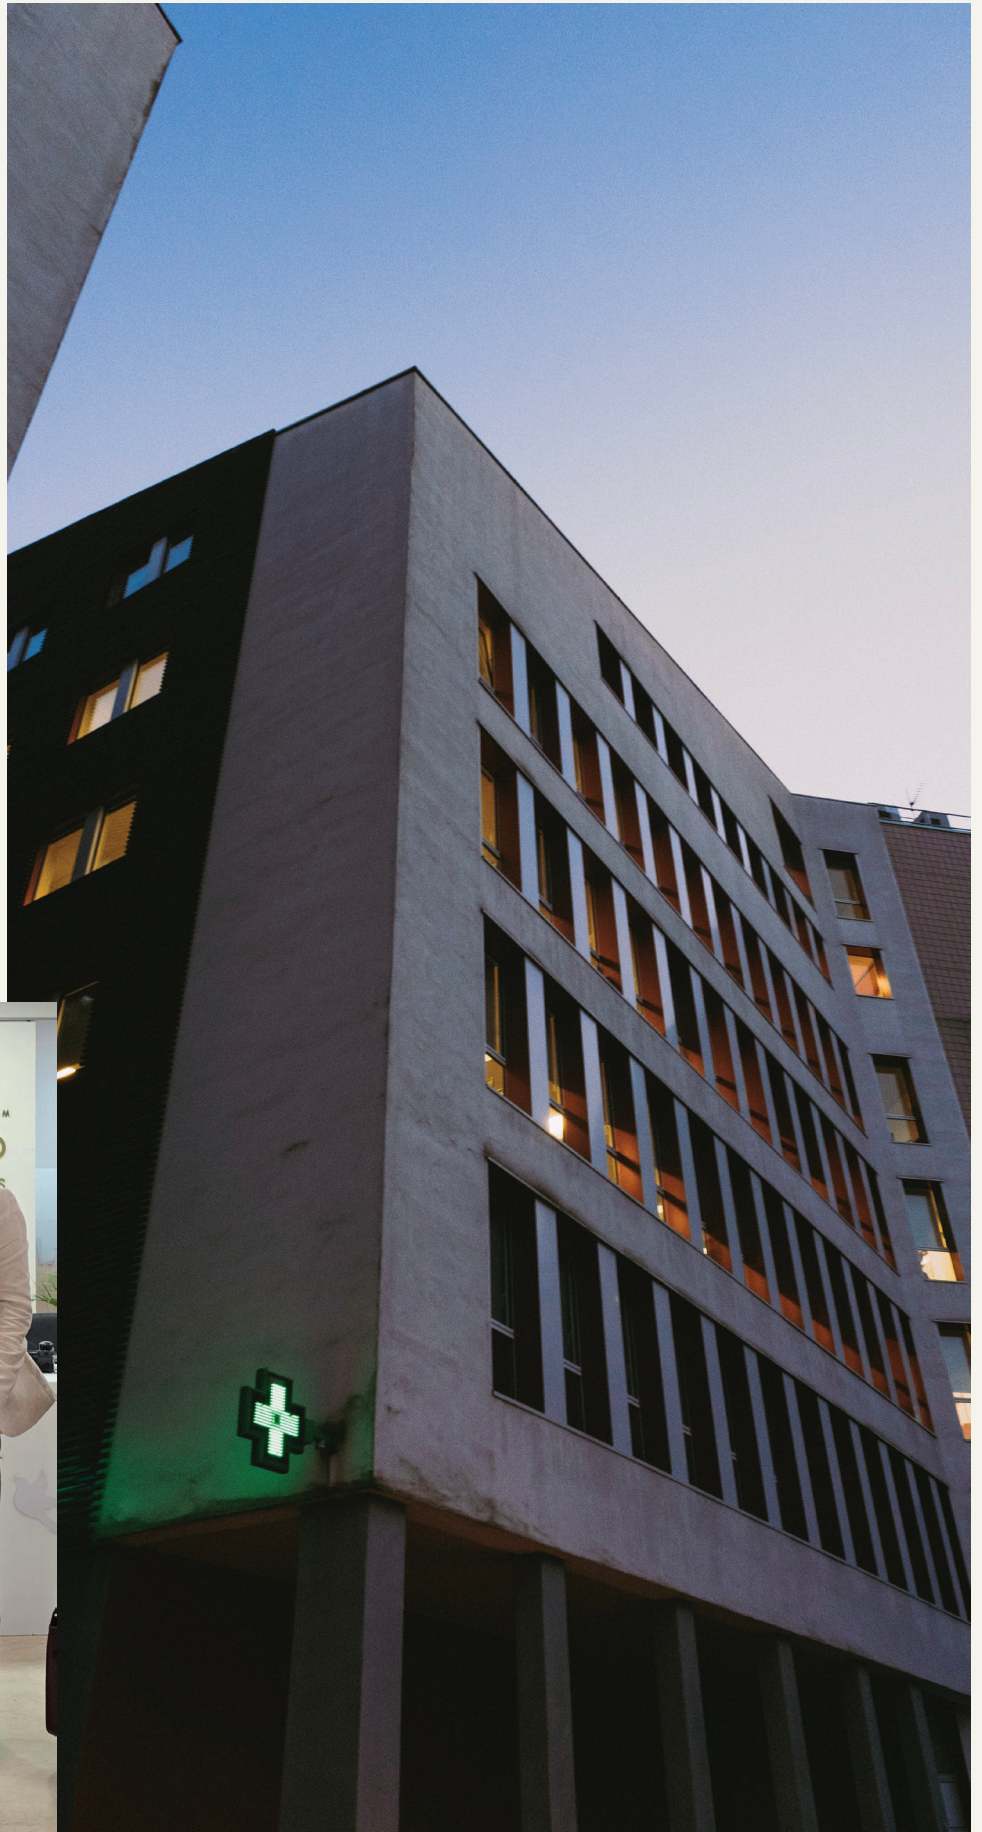

Navigating a foreign healthcare system is daunting. We replace that uncertainty with dedicated, doctor-led accompaniment exactly when it matters most. From your initial medical document review to hospital admission, complex specialist consultations, and post-treatment recovery, our physicians ensure you and your family are never navigating the system alone.

Institutional Presence

Rigorous Clinical Vetting

We do not rely on third-party metrics. Our medical leadership conducts direct, face-to-face clinical audits with medical directors at premier hospital networks worldwide. This ensures flawless case alignment, transparent communication, and elite global care pathways before a patient ever arrives.

Clinical Collaboration

Unified Expertise

Forging strategic clinical alliances with leading global specialists and trusted institutional partners. By bridging medical expertise across borders, we eliminate administrative friction and deliver a seamless, gold-standard continuum of care for every patient we serve

The Infrastructure of Trust

Global leadership in healthcare navigation cannot be built entirely through emails, algorithms, or remote coordination.

It requires presence.

Engaging with global healthcare leadership at the 8th International Summit on Medical Value Travel – shaping the definitive future of cross-border clinical care.

Bilateral Corridors & Global Engagements

Bridging Sovereign Healthcare Networks

True patient navigation cannot be governed through remote algorithms or fragmented intermediaries. At Arovia Health, our corridors are built on active diplomatic engagement, institutional alignment, and continuous dialogue with international healthcare leaders. By establishing direct bridges across Africa, the Middle East, Central Asia, and the subcontinent, we ensure every cross-border referral meets an institutional standard of safety, clinical oversight, and unbroken continuity.

Solidifying cross-border alliances to expand structured, physician-led corridors between emerging markets and premier clinical centers of excellence.

Integrative Clinical Rehabilitation

Restoring Vitality Through Supervised Holistic Care

True recovery extends far beyond acute surgical intervention. At Arovia Health, we believe that to heal the body, we must also restore the mind.

In strict coordination with your treating specialists, we facilitate seamless transitions to specialized post-acute rehabilitation facilities. Here, clinically supervised protocols—including targeted physical therapy, ICU step-down care, and monitored oncological recovery—are carefully integrated into your personalized recovery pathway.

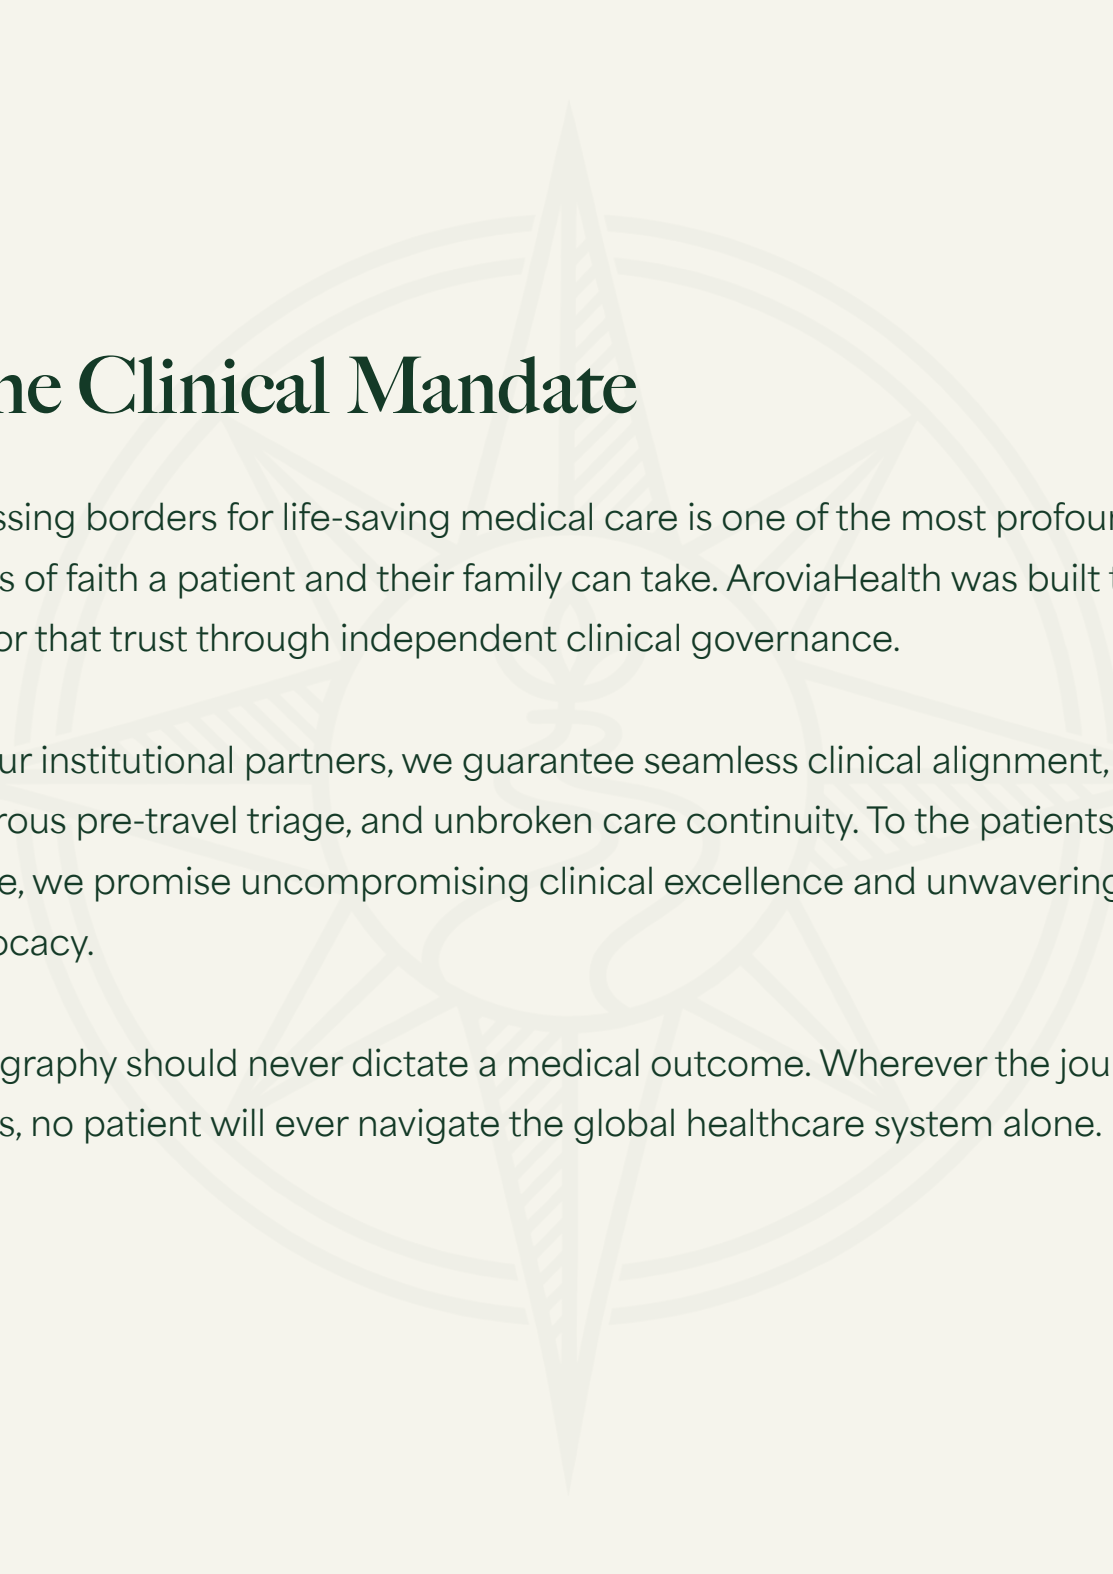

We address both the physical demands of recovery and the emotional stress of the journey, ensuring every patient returns home not just treated, but entirely restored.

World-Class Clinical Care Transparently Priced

High-Complexity / Frontier Treatment		Western Private (Approx.)	India (Estimated Base Rate)
	CAR T-Cell Therapy (Advanced Blood Cancers)	~\$400,000	~\$75,000
	Proton Beam Therapy (Precision Oncology)	~\$120,000	~\$35,000
	Liver / Kidney Transplant	~\$95,000	~\$22,000
	Complex Cardiac Bypass (CABG) / Valve	~\$55,000	~\$7,500
	Total Joint Replacement (Hip/Knee - U/L)	~\$28,000	~\$5,000

- All listed rates are estimates; final costs may vary based on individual clinical requirements, specialized treatment plans, and final hospital billing.
- International prices are indicative and provided for comparison purposes.

The Clinical Mandate

Crossing borders for life-saving medical care is one of the most profound leaps of faith a patient and their family can take. AroviaHealth was built to honor that trust through independent clinical governance.

To our institutional partners, we guarantee seamless clinical alignment, rigorous pre-travel triage, and unbroken care continuity. To the patients we serve, we promise uncompromising clinical excellence and unwavering advocacy.

Geography should never dictate a medical outcome. Wherever the journey leads, no patient will ever navigate the global healthcare system alone.
